

tiptel 540 SD

Professional message center with SD memory card

The tiptel 540 SD is an extremely professional message center and the extensive one successor to the successful tiptel 540. The tiptel 540 SD has, in contrast to the previous model, one removable SD memory card. Messages can be sent to this and calls are saved and listened to via the computer. All standard card readers (connected via USB to, or built into your PC) are suitable for reading the SD memory card of the tiptel 540 SD. Your memory card will be cleaned up and the optimum memory capacity will be saved retained. The tiptel 540 SD comes standard with an SD 512 MB memory card (16 hours recording). This can be expanded to 2 GB (64 hours).

In addition, the tiptel 540 SD has various familiar functions such as an integrated telephone register, adjustable recording capacity, high-quality digital sound quality and an integrated mailbox system for four users. The 540 SD is also equipped with a large one illuminated graphic display, number display, a call list for 50 telephone numbers with date and time, time control and special call signals for important callers. Thanks to the high-quality Flash Memory technology messages and recordings clearly displayed. The SMS function makes it possible, just like with one mobile phone, simple SMS messages to receive and send. Also the function You can call the number by means of an SMS message inform that there a new message has been recorded.

Moreover, you can easily do the professional expand message center with any new features through an update the software via the telephone connection. This way you always have up-to-date software with the newest functionalities for the tiptel 540 SD.
