## Professional multifunctional message center

The tiptel 570 SD is a professional message center for the analogue line and is equipped with a removable SD memory card, an integrated one mailbox system and an audio input and output. In addition, it can message center connected to the USB port of the PC making it, in combination with the PC, can have special functionalities.

The removable SD memory card of the tiptel 570 SD can be used to record messages, messages and conversations are saved and saved. The advantage is that all standard card readers (connected via USB to, or built into your PC) are suitable to read the SD memory card. This makes it possible to archive or listen to recordings again via the computer. This way you can easily save data, your memory card will remain clean and the memory capacity will remain optimal. By default, the tiptel 570 SD comes with an SD memory card of 512 MB, enough for a recording capacity of 16 hours.

A special possibility is the connection of a foot switch and a (supplied) headset. In a comfortable way many can messages or recorded (dictated) texts quiet in privacy, without disturb others in the area. An ideal solution for example, pharmacists, general practitioners and secretaries.

Another possibility is that the tiptel 570 SD calls all calls via time control can be automatically forwarded to a specific telephone number. Practical for a general practice: for example, the caller automatically forwarded to the person in charge outside the practice hours doctor.

Setting the functions can be done via the message center as well as via a PC be done. In addition eg message texts or important messages on the PC saved and possibly be edited. Even send and receive from SMS messages via the PC belongs to the possibilities.
